RISK MANAGEMENT

SuMi TRUST UK adopts a framework that enables senior management to exercise strategic oversight on tax matters in all investments and significant business decisions.

SuMi TRUST UK actively seeks to identify, monitor and manage tax risks through a system of tax risk assessment and controls as part of overall control framework.

When considering a new products or business, SuMi TRUST UK analyse the relevant risks (including tax, legal, regulatory, accounting risks) and minimise the risks through effective internal management and controls.

This framework for new products/business approval consists of the following components:

- New products/business consideration/checklist and due diligence;
- Relevant committee/relevant reporting and authorisation process; and
- Approval.

Appropriate training is given to staffs to ensure they have adequate knowledge to understand relevant risks. When new products, transactions or business proposals are considered to be outside of SuMi TRUST UK's risk appetite, SuMi TRUST UK consults with HMRC and/or external adviser where necessary.

TAX PLANNING

SuMi TRUST UK's activities are driven by the commercial needs of the business, its clients, and its anticipated future development within the confines of the law. Although UK taxes are taken into account in achieving these objectives, SuMi TRUST UK does not structure its affairs nor undertake transactions that are contrived, artificial, or based solely on tax merits. SuMi TRUST UK only enters into tax planning that has genuine commercial substance.

SuMi TRUST UK's culture and internal code of conduct rules do not permit aggressive tax planning in any aspects of the business including:

- its own tax affairs;
- products and services; and
- remuneration packages for employees.

SuMi TRUST UK seeks to take advantage of available tax incentives, reliefs and exemptions in accordance with, and in the spirit of, tax legislation. SuMi TRUST UK is committed to comply with not only the letter of the tax law but also to ensure the interpretation of the law is aligned with the intentions of the UK Parliament. Where there is an uncertainty in the interpretation or an application of tax law, advice is sought from external tax advisors.

SuMi TRUST UK's procedures ensure intra-group transactions are priced on an arm's length basis and thereby support policies that ensure there are no artificial diversion of profits between high and low tax countries.

SuMi TRUST UK's commitment to tax transparency and global initiatives is demonstrated in its adherence to information classification requirements under Common Reporting Standards (CRS) and The Foreign Account Tax Compliance Act (FATCA).
